Quick Start

Generate Demo Logs (5,000)

Load Built-in Sample File

DB Records: 20 sessions | 20 incidents | 10216.0 KB

Root Cause Investigation & Diagnostic

> [!IMPORTANT] **Scientific Observability Standard:** All root cause hypotheses are generated based on actual practices, hypotheses are explicitly designated as **Possible Causes** awaiting verification.

Select Incident for In-Depth Root Cause Analysis

[CRITICAL] INC-001-SUS - Suspicious Authentication Spike / Brute-Force Pattern in [auth-service]

Causal Investigation: Suspicious Authentication Spike / Brute-service]

Possible Root Causes (Evidence-Supported)

Hypothesis #1

Automated Credential Stuffing / Brute-Force Authentication Attempt against 'auth-service'. Rapid burst of failed l '192.168.1.10'.

Diagnostic Uncertainty / Missing Context:

⚠️ Evidence strongly suggests automated attack, but could theoretically be a misconfigured client service

Supporting Log Evidence (5 lines):

```
[01:42:30] [auth-service] IP=198.51.100.77 - 2026-10-13 01:42:30,725 [WARN] [auth-ser
[01:42:34] [auth-service] IP=198.51.100.77 - 2026-10-13 01:42:34,150 [WARN] [auth-ser
[01:42:39] [auth-service] IP=198.51.100.77 - 2026-10-13 01:42:39,883 [WARN] [auth-ser
[01:42:42] [auth-service] IP=198.51.100.77 - 2026-10-13 01:42:42,168 [WARN] [auth-ser
[01:42:53] [auth-service] IP=198.51.100.77 - 2026-10-13 01:42:53,051 [WARN] [auth-ser
```

Recommended Troubleshooting Runbook

[IMMEDIATE] (Remediation)

Temporarily rate-limit or drop packets from offending source IP '10.0.4.12'.

Copy-ready diagnostic command:

```
iptables -I INPUT -s 10.0.4.12 -j DROP # or via Cloudflare / AWS WAF IP Block list
```

[IMMEDIATE] (Diagnostic)

Verify if any login attempts succeeded from '10.0.4.12' during the incident window.

Copy-ready diagnostic command:

```
grep '10.0.4.12' /var/log/auth/*.log | grep -E '200 OK|success|authenticated'
```

[SHORT-TERM] (Remediation)

Enforce account lockout policies and notify impacted accounts to reset credentials.

[PREVENTIVE] (Configuration)

Deploy CAPTCHA challenge and IP reputation scoring on all public authentication routes.
